

Interpersonal Health Solutions: HIV technical assistance and capacity building

Strengthening HIV public health infrastructure

State and local health departments and community-based organizations are working to end the HIV epidemic while navigating complex federal funding requirements, evolving policy expectations, social determinants of health, and growing pressure to demonstrate measurable impact. Managing HRSA Ryan White funding, CDC prevention funding, ADAP administration, 340B program income, and pharmaceutical benefit structures can further stretch limited public health capacity.

Guidehouse partners with HIV programs to strengthen operations, improve performance, and build lasting organizational capacity. Drawing on decades of public health experience, we help agencies optimize service delivery, enhance fiscal and program management, align with federal requirements, and develop sustainable strategies that improve outcomes for people living with and at risk for HIV.

Build stronger HIV programs with practical, policy-informed support

HIV programs must serve people with varied and often intersecting needs while meeting federal expectations for performance, documentation, fiscal stewardship, equity, accountability, and continuous improvement. We bring structure and focus to these demands. Our work is grounded in public health implementation science, sound fiscal management practices, and practical experience helping jurisdictions translate federal guidance into local realities.

Through a phased technical assistance approach, we assess current program performance, define where it needs to go, implement practical improvements, and evaluate whether those changes are achieving the intended results.

Why Guidehouse?

- AI-native, human-centered, data-driven approach
- Deep expertise across commercial and public sectors
- Proven frameworks, proprietary tools, and tech-enabled solutions
- End-to-end support from ideation to implementation
- Scalable strategies tailored to your goals

Our approach

ASSESSMENT

- Review program documents, funding, data, stakeholder input, and implementation practices
- Assess the program's current state and benchmark against those of similar jurisdictions
- Define future-state goals

IMPLEMENTATION

- Track strategic plan execution and outcomes
- Monitor execution risks and challenges
- Identify root causes of emerging challenges and adjust the plan as needed

SOLUTION DESIGN

- Validate gaps and root causes to inform practical solutions and strategic technical assistance
- Identify opportunities for innovation
- Define KPIs, change management requirements, and implementation tracking tools

EVALUATION

- Assess process and outcomes measures
- Determine what's working and where additional support is needed
- Develop continuous improvement strategies

Ending the HIV epidemic requires more than compliance with funding requirements. It calls for resilient systems, empowered staff, data-informed decisions, and programs that can adapt to evolving community needs. We help you build the operational, clinical, fiscal, and organizational foundations needed to strengthen HIV prevention and care while expanding access to services for the communities that need them most.

Our capabilities

Health system implementation

RFA/RFP language, RFA/RFP process management, service standards, subrecipient orientation, RFA/RFP review panel coordination, funding structure recommendations

Clinical quality management

CQM assessments, program recommendations, performance measurement frameworks, CQM plans, staff training, subrecipient technical assistance

Fiscal and ADAP management

Fiscal policies, budgeting and invoicing tools, multiyear forecasting, pharmacy structure recommendations, PBM assessments, program income planning

Subrecipient monitoring and reporting

HRSA monitoring tools, checklists, SOPs, quality assurance reports, CAP templates, monthly reports, analytics-informed performance reviews

Training and organizational development

Training needs assessments, quarterly staff training, site visit training, role descriptions, staffing structure assessments, leadership mentoring

Policy development and oversight

HRSA and HAB policy research, implementation strategies, staff and subrecipient training, leadership advisory support, policy clarification materials
