

INFRASTRUCTURE, RECOVERY &amp; RESILIENCE

# Disaster recovery

## Grants Management, Continuous Monitoring & Compliance

As the impact of natural disasters grows amid expanded federal oversight and reduced funding, government agencies face greater pressure to optimize, foster integrity, strengthen controls, and improve service delivery. Guidehouse has been a steadfast partner with state and local governments and organizations working in disaster recovery.

We support all phases of the disaster recovery and resilience lifecycle

Our experts across housing, disaster recovery, healthcare, capital infrastructure, transportation, and financial and risk management have supported the Federal Emergency Management Agency and a multitude of Community Development Block Grant-Disaster Recovery (CDBG-DR) grant programs across states. Bringing deep industry expertise, technological savvy, and commitment to serving communities, we help affected residents, businesses, and institutions recover and flourish through end-to-end CDBG-DR grant program management and integrity monitoring.

### Our approach

Realize immediate value and long-term compliance assurance through our ready-to-deploy tools and templates and risk-based approach, which features:

**Compliance reviews** of financial systems, duplication of benefits, federal requirements, and HUD objectives to ensure transparent, accountable, delay-free fund use

**Subrecipient assessments** across internal controls, compliance, and expense eligibility and allowability based on the subrecipient monitoring plan

**Contractor and subrecipient monitoring** to ensure compliance, protect federal funds, and maintain audit readiness across programs as distribution increases

**Transparent, accountable program implementation** and trustworthy, compliant reporting

**Clear documentation and real-time insights** that build trust, meet HUD audit needs, and balance oversight with smooth program delivery

**AI-driven technologies** to streamline activities such as identity and application data verification

**Fraud threat intelligence design and integration** with your fraud program for greater sustainability

## Our work in action

### Emerging stronger through streamlined processes

After an unprecedented storm produced massive damage, we partnered with a Northeast state to support response efforts and establish a disaster recovery agency. Providing program management, integrity monitoring, and operational assistance across housing, infrastructure, and compliance helped the state verify damage estimates and secure federal recovery funding.

Through process redesign, technology evaluation, and data-driven insights, our teams improved efficiency and customer service while maintaining compliance with regulations. This enabled the state to quickly disburse federal aid to those most in need by implementing systems that reduced application turnaround times and streamlined payment processes. Our involvement also strengthened the state's resilience and disaster recovery operations.

### Fostering collaboration for long-term resilience

Following deadly tornado damage, a Midwest city needed help deploying its CDBG-DR funding quickly and efficiently while meeting complex grant requirements. Our teams helped city leaders maximize funding impact by adopting resilient, sustainable designs.

We also supported the launch of programs for low-income families and community engagement. These efforts accelerated rebuilding, fostered collaboration, and enhanced long-term resilience by fundamentally changing how the community solves problems with a renewed emphasis on teamwork, innovation, and resourcefulness.

## Making a genuine impact—together

Through innovative solutions, strategic prioritization, integrated planning, and enhanced compliance and reporting, our teams work with you to maximize the impact of your investments and resources.

## Our capabilities

### Grants Management

By connecting grantors and recipients, we align requirements and expectations to streamline operations. Our expertise, proven practices, and proprietary tools maximize outcomes.

### Program Management, Execution & Delivery

Using proven frameworks, we tailor solutions to your needs—creating more efficient business processes, knowledge management, and cost optimization strategies that maximize ROI while mitigating risk.

### Risk, Recovery & Resilience

We bolster infrastructure reliability through risk identification, capital planning, ongoing monitoring, response strategies, and community engagement.

## About Guidehouse

Guidehouse is a global AI-led professional services firm delivering advisory, technology, and managed services to the commercial and government sectors. With an integrated business technology approach, Guidehouse drives efficiency and resilience in the healthcare, financial services, energy, infrastructure, and national security markets.
