Guidehouse

Enabling Care at Home

Hospital @ Home + Remote Patient Monitoring

Guidehouse offers vendor agnostic strategies and services to help payers, providers, and government entities develop acute care at home program and remote patient technology solutions to enhance patient experience, reduce the total cost of care, and improve margin.

Can your organization care for an acute care patient in their home?	Is your organization maximizing innovative solutions such as Remote Patient Monitoring + (RPM+) in preventing hospitalization for chronic care patients?	Is there alignment to achieve the organization's goals related to improved quality, enhanced patient experience, lower cost of care, and linkage of healthcare services?	Has COVID-19 put a spotlight on capacity issues that are impacting your ability to optimize patient care?

Deploying a thoughtful strategy and operational plan for Enabling Care at Home programs, such as for hospital-at-home and remote patient monitoring services, can help providers improve their return on investment and competitive advantage.

Hospital at Home

This model is for patients ill enough for hospitalization but stable enough to be treated in the comfort of their home with daily caregiver and clinician visits both in-person and via telehealth.

Remote Patient Monitoring + (RPM+)

These services use digital technologies to collect medical data from patients in one location and transmit it to another location for review.

Our Hospital @ Home and Remote Patient Monitoring services help organizations:

- Enhance patient experience and outcomes
- Reduce readmissions and prevent penalties
- Improve management of targeted populations with chronic diseases
- Capture new revenue with acute care capacity by shifting targeted patient populations to hospital-at-home care
- Create strategic growth opportunities for patients in outlying markets
- Decrease acute length of stay and skilled nursing facility usage
- Improve patient transitions and safety, especially during surges (as experienced during the COVID-19 pandemic)
- Understand and apply for the CMS Acute Hospital Care at Home program
- Manage the cost of care

Guidehouse's total **Enabling Care at Home** solution offers a comprehensive approach to assess, design, and deploy targeted or enterprise home care models that achieve your organization's top priorities. This includes helping providers develop comprehensive remote patient technology solutions to support patient-centric home setting experiences that can dramatically reduce total cost of care.

Imperatives

- Patient-centric care delivery at home
- Technology that supports healthier lives
- Improved care outcomes
- Maintained or better expense management
- Engaged, satisfied patients
