

# Value-Based Management

## Our Point of View

As organizations work to assume risk for the total cost of care, many struggle to develop the capabilities required to successfully transition from fee-for-service to value-based reimbursement models. To effectively manage lives under value-based contracts, organizations must proactively manage patients from preventive care through medical incidents, rehabilitation, and maintenance.

Organizations need a trusted advisor who understands the clinical, operational, strategic, and technological components necessary for success in value-based management. Key success drivers include:

- + Practice transformation to improve efficiency and reduce physician burnout
- + Access to care
- + Transitions of care
- + Care coordination across the continuum
- + Reduced ED, inpatient, and post-acute utilization
- + High performing post-acute networks
- + Medication management
- + Innovative care delivery models

## Our Solutions

Guidehouse's Value-Based Management services include effective, efficient, and sustainable population health management strategies. Our multidisciplinary team of former health system and payer executives guide leaders through comprehensive capabilities assessments, prioritized program design, and implementation support. Since an integrated approach that addresses each point on the continuum is critical, our collaborative teams work with health systems, ACOs, CINs, and large physician groups to create clinical programs, develop care teams, and empower practices that are purposefully designed to integrate care across the continuum.

## Our Impact

### Health System Drives Savings through Bundled Payment Program:

Optimization of post-acute network, implementation of a nurse navigation program, patient education, and development of evidence-based care pathways under a Comprehensive Care for Joint Replacement payment model **helped a Midwest health system save \$2.3 million.**

### Direct Contracting Savings:

A Northwest health system is on track to achieve savings in the first year of a direct contracting program through creation of a preferred post-acute partner network and implementation of both skilled nursing facility 3-day and home health homebound benefit enhancements.
