

Complying with CMS Price Transparency Rules

Cracking Down on Compliance

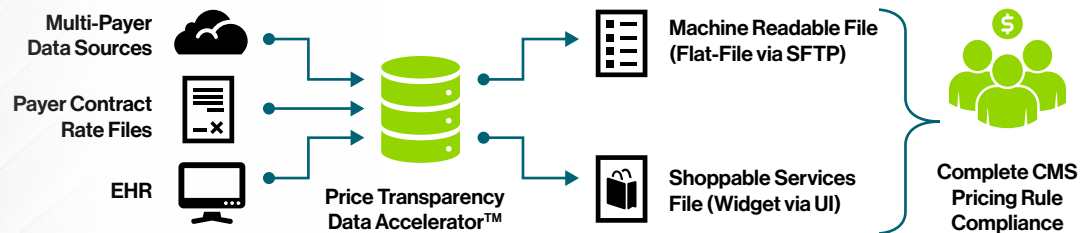

To improve provider compliance with the latest federally mandated price transparency ruling, CMS has begun to fine small hospitals \$109,500 and large hospitals more than \$2 million for non-compliance.

Take the Pain Out of Price Transparency

With Guidehouse's proprietary *Price Transparency Data Accelerator™*, our solution engineers produce the compliant charge files required by CMS (*Machine-Readable File, Shoppable Services File*) to reduce overall financial risk and deliver targeted competitive intelligence.

CMS Non-Compliance Penalties

# Beds	Daily Rate	Max Annual Charge (per Hospital)
< 30	\$300	\$109,500
31-550	\$10/bed	\$2,007,500
> 500	\$5,500/day	\$2,007,500

Our objective is simple.

No matter how complex your pricing data environment is within your organization, we can help you solve immediate CMS compliance needs while staving off financial penalties.
